

**RESEARCH ASSOCIATE: using systems
thinking and group model building to
address inequalities in diet (2 positions)**
MRC Epidemiology Unit

CLOSING DATE: 4th May 2025
Job Reference: SJ45598

Research associate (2 positions)

Salary:

£38,103 - £46,548

Contract:

Fixed Term

Location:

Cambridge or hybrid

Faculty / Department:

MRC Epidemiology Unit

Responsible to:

Jean Adams;

jma79@medschl.cam.ac.uk

Working Pattern:

Full Time

The University of Cambridge has a Hybrid Working Policy that aims to enable as many staff as possible to work in a hybrid way if they so wish, whilst recognising that some roles will include tasks that can only be performed on

Purpose of the role

We seek to appoint two post-doctoral Research Associates with experience in planning and delivering stakeholder workshops and analysing quantitative data to work on a randomised controlled trial of a group model building intervention to address inequalities in diet. Knowledge of, and experience in, systems thinking and group model building are highly desirable.

Based in the Unit's Population Health Interventions Programme, the primary role of these posts is to refine the intervention, develop the protocol, secure governance approvals, recruit local authority participants, deliver the intervention and lead all aspects of collection, analysis and reporting of quantitative outcome data.

We have co-developed a dietary-focused group model building intervention with public health teams that helps local stakeholders to collaborate to identify place-specific solutions to dietary inequalities. We have been awarded funding from UK Research & Innovation to refine and test this in a randomised controlled trial in English local authorities.

In the UK, people living in less affluent circumstances consume less healthy diets and suffer from more diet-related disease. These dietary inequalities are due to complex processes at individual, local, national and international levels meaning simply encouraging people to make healthier 'choices' is not enough. Wider approaches that change the social, physical and financial context in which choices are made are required. This needs cross-sector collaboration.

Systems thinking is one way to approach complex problems like dietary inequalities. Group model building is a structured approach that uses systems thinking to achieve a shared understanding of a problem and identify potential solutions and can support cross-sector collaboration. It is not yet known if group model building changes what solutions are ultimately delivered. Our trial will assess this. The intervention involves a full day, in person, group model building workshop with around 15 local stakeholders, plus online meetings with key contacts before and after the workshop.

The successful applicants will work together to develop a detailed protocol. They will then pilot intervention delivery and data collection and refine the protocol. Next, they will work with our study co-ordination team to secure governance approvals. They will then recruit around 60 English local authorities and deliver the intervention in around 30. Finally, they will collect outcome data at the local authority and participant level using surveys and interviews and analyse this.

Key responsibilities

Research and scholarship

With appropriate guidance and support:

1. develop a research protocol from outlines presented in the funding application;
2. execute the research according to the protocol developed;
3. ensure the research is carried out in accordance with internationally accepted standards and in compliance with local policies and national legal requirements;
4. write up research findings for publication and presentation to a variety of audiences;
5. contribute to knowledge exchange activities to maximise the societal impact of your research and contribute to the Unit's mission in the public engagement of science, and the translation of research findings into improvements in public policy;
6. manage your own research and administrative activities;
7. provide the enthusiasm and intellectual energy necessary to deliver on your responsibilities to agreed timelines;
8. act independently to solve research problems as they arise, some of which may require novel approaches;
9. be comfortable with uncertainty, especially in the early stages of protocol development and research execution.

Teaching and learning support

As relevant to your experience, career aspirations and other demands of the post, and with appropriate guidance and support:

10. make contributions to the teaching and learning programmes in the Unit;
11. assist in the supervision of PhD and MPhil projects;
12. support, plan and deliver seminars relating to your research area.

Liaison and networking

13. work collaboratively with your line manager and others in the project team, and with other colleagues and students in the Unit;
14. build internal and external contacts and participate in networks for the exchange of information and to form relationships for future collaboration;
15. contribute to Programme and Unit-wide discussions on developments within the field and other activities as required.

Planning and organising

16. plan the use of research resources as appropriate;
17. plan and manage your own research activity in collaboration with others.

Development

18. in discussion with your line manager, identify and action ongoing learning and development needs. On average approx. 10% time, including on-the-job learning, is intended for this. Flexibility is expected when project-related tasks need to take priority.
19. play an active role in learning new skills and continually updating your knowledge and understanding in relevant fields.

Person Specification

Criteria	Essential	Desirable
Education & qualifications		
PhD in population health sciences or another relevant subject, or due to complete within 3 months of applying	✓	
Specialist knowledge & skills		
Proven skills in planning and delivering stakeholder workshops	✓	
Knowledge of approaches to quantitative data analysis	✓	
Strong knowledge of, and clear interest in, public health approaches to supporting healthy diets and reducing dietary inequalities		✓
Knowledge and understanding of systems thinking and complexity	✓	
Knowledge and understanding of randomised controlled trials	✓	
Knowledge of the role of local policy in supporting population health		✓
Knowledge of contemporary food governance in English local authorities		✓
Relevant experience		
Experience of group model building & causal loop diagramming		✓
Experience of working in a research environment	✓	
Experience of working independently to solve research related problems and challenges	✓	
Experience of teaching others at postgraduate level		✓
Successful involvement in the co-ordination of collaborative projects		✓
Interpersonal & communication skills		
Experience of presenting scientific work, both written and orally to academic and non-academic audiences, as first author	✓	
Experience of working collaboratively as a member of a team	✓	
Experience of mentoring others on the job		✓
Fluency in English	✓	
Excellent written and oral communication skills	✓	
Additional requirements		
Motivated to learn and a willingness to contribute to the wider efforts of the research team and the activities of the Unit	✓	
Evidence of engaging in continuous professional development	✓	
Willingness to travel to within the UK for intervention delivery and to present research findings	✓	

Declaration on Research Assessment

The University of Cambridge is a signatory to the San-Francisco Declaration on Research Assessment (DORA), and in recruitment or promotion evaluations will assess research on the basis of its merits rather than the journal or venue in which it is published. Applicants should not include Journal Impact Factors or uncontextualized metrics in their applications. Full details are at: <https://www.research-strategy.admin.cam.ac.uk/research-policy/DORA>

Behavioural Attributes

This section summarises the behavioural attributes (or competencies) that we expect the role holder to be able to demonstrate, at what level and whether this is an essential or desirable requirement. Full definitions are at: <https://www.hr.admin.cam.ac.uk/policies-procedures/behavioural-attributes>

Please review these and provide specific examples in your application of how you have demonstrated these attributes in your work, education or other experience. It will assist your application if you explain the situation, what you did and what the outcomes were.

Attribute	Level
Valuing Diversity	A
Achieving Results	B
Communication	C
Innovation and Change	C
Negotiating and Influencing	C
People Development	C
Relationship Building	B
Strategic Focus	C

MRC Epidemiology Unit

The MRC Epidemiology Unit is working to improve the health of people in the UK and around the world.

Obesity, type 2 diabetes and related metabolic disorders present a major and growing global public health challenge. These disorders result from the complex interplay between genetic, developmental and environmental factors throughout life.

The mission of the Unit is to investigate the individual and combined effects of these factors and to develop and evaluate strategies to prevent these diseases and their consequences.

www.mrc-epid.cam.ac.uk

Our Research, Teaching and Training

Our research is delivered by MRC core-funded and departmental programmes that are supported by specialist teams in data management, IT, laboratory analysis, statistics, dietary assessment, physical activity and anthropometric measurement, study coordination, field epidemiology and knowledge exchange. MRC core-funded programmes are:

- Aetiology and Mechanisms of Diabetes and Related Metabolic Disorders of Later Life
- Early Life Aetiology and Mechanisms of Diabetes and Related Metabolic Disorders
- Nutritional Epidemiology
- Physical Activity Epidemiology
- Behavioural Epidemiology and Interventions in Young People
- Prevention of Diabetes and Related Metabolic Disorders in High Risk Groups
- Population Health Interventions.

In addition the department leads programmes in Public Health Modelling and Diet and Physical Activity Interventions in Patient Populations.

We lead the **NIHR Global Diet and Activity Research Network (GDAR)**, an international research partnership to help combat poor diet and physical inactivity in low and middle income countries. The partners in the GDAR Network include Universities in South Africa, Cameroon, Kenya and the West Indies. www.gdarnet.org

The Nutrition, Obesity, Metabolism and Endocrinology research theme of the NIHR Cambridge Biomedical Research Centre (BRC) is also co-hosted by the MRC Epidemiology Unit, co-led by Prof Nita Forouhi. This theme works closely with the [Nutrition Measurement Platform](#) for the measurement of diet, nutrition and physical activity in observational studies, trials, natural experimental studies and surveys.

The Unit runs a **BioRepository**, which provides a facility for short-term storage, processing and arraying of biological samples for the measurement of biomarkers, and also undertakes high-throughput analyses.

Cambridge Epidemiology and Trial Unit (CETU) is an NIHR provisionally-accredited clinical trials unit led by the department. CETU focuses on investigator-led randomised controlled trials (RCTs) and other well designed studies that evaluate interventions to improve health care and public health.

The Unit is part of **Cambridge Population Health Sciences Partnership** that runs the **MPhil in Population Health Sciences**. There is a strong commitment to teaching and training at all levels and an ethos that this is part of everybody's role. www.phs.group.cam.ac.uk

School of Clinical Medicine

Doing great work in a great place to work

About the School

The School of Clinical Medicine currently employs nearly 3,000 people, spanning all varieties of staff type from Academic Professors to administrative support.

In 1976 in response to the recommendation of the Royal Commission on Medical Education in the late 1960's, a complete medical course was re-established in Cambridge with the opening of the School of Clinical Medicine at the new Addenbrooke's Hospital site.

On 21st November 1980, HRH The Duke of Edinburgh, the Chancellor of the University of Cambridge, officially opened the Clinical School Building which presently accommodates the medical library, lecture theatres and seminar rooms.

The University of Cambridge School of Clinical Medicine aspires to change the practice of medicine and improve biological understanding in a wide range of clinical specialties and scientific disciplines. Collaborative research, both within biomedicine and crossing the boundaries to the mathematical, physical and social sciences, is key to our approach. The School also supports key enabling technologies and facilities in imaging, bioinformatics and biological systems. The main areas of research interest are:

- Cancer research
- Cardio-Respiratory Medicine
- Cellular mechanisms of disease
- Diabetes, Endocrinology and Metabolism
- Epidemiology, Public Health and Primary Care
- Genetics and Genetic Medicine
- Haematological and Transplantation Medicine
- Infection and Immunity
- Neurosciences and Mental Health
- Stems Cells and Regenerative Medicine.

Professor Patrick Maxwell, Regius Professor of Physic and Head of the School of Clinical Medicine

The School aims to provide leadership in education, discovery and healthcare. It will achieve this through; inspirational teaching and training, outstanding basic and clinical research and integration of these to improve medical practice for both individual patients and the population.

The School will:

Through inspirational teaching and training, educate individuals who:

- will become exceptional doctors or biomedical scientists
- combine a depth of scientific understanding with outstanding clinical and communication skills demonstrate a caring, compassionate and professional approach to patients and the public and
- are equipped to become future international leaders of their profession.

Through its commitment to the pursuit of excellence, support scientists of international standing in basic and clinical research aiming to:

- understand fundamental biology and thereby the mechanisms underlying disease
- integrate basic and clinical research
- apply a rigorous mechanism-based approach to clinical problems and
- innovate to solve the health challenges of our society.

Terms of Appointment

Tenure and probation

Appointments will be made on a fixed-term basis for a period of 36 months due to limited funding available for a specific purpose. Appointments will be subject to satisfactory completion of a six-month probationary period.

Hours of Work and Working Pattern

The hours of work for the position are 37.5 hours per week, working Monday – Friday.

Pension

You will automatically be enrolled to become a member of USS (Universities Superannuation Scheme) – a hybrid pension scheme. For further information please visit: www.pensions.admin.cam.ac.uk/.

Annual leave

Full time employees are entitled to annual paid leave of 41 days inclusive of public holidays. For new part-time employees, annual leave will be pro rata'd based on days worked.

General information

Pre-employment checks

Right to work in the UK

We have a legal responsibility to ensure that you have the right to work in the UK before you can start working for us.

If you do not have the right to work in the UK already, any

offer of employment we make to you will be conditional upon you gaining it.

Health declaration: Once an offer of employment has been made the successful candidate will be required to complete a work health declaration form.

Qualifications: The person specification for this position lists qualifications that are essential and/or desirable. Please note that if you are offered the post you will be asked to provide your relevant original certificates of these qualifications.

References: Offers of appointment will be subject to the receipt of satisfactory references.

Equality and Diversity

We particularly encourage women and /or candidates from a Black, Asian and Minority Ethnic background to apply for this vacancy as they are currently under-represented at this level within our University.

Information if you have a disability

The University welcomes applications from individuals with disabilities. We are committed to ensuring fair treatment throughout the

recruitment process. We will make adjustments to enable applicants to compete to the best of their ability wherever it is reasonable to do so and, if successful, to assist them during their employment.

Information for disabled applicants is available at <http://www.admin.cam.ac.uk/offices/hr/staff/disabled/>

We encourage you to declare any disability that you may have, and any reasonable adjustments that you may require, in the section provided for this purpose in the application form. This will enable us to accommodate your needs throughout the process as required. However, applicants and employees may declare a disability at any time.

If you prefer to discuss any special arrangements connected with a disability, please contact, the Department Administrator, who is responsible for recruitment to this position. Alternatively, you may contact the HR Business Manager responsible for the department you are applying to via hrenquiries@admin.cam.ac.uk.

The University

The University of Cambridge is consistently ranked one of the best universities in the world, achieving academic excellence through its Faculties, Departments and other Institutions, together with the 31 Colleges.

The University is renowned for its record of discovery and innovation. It is one of the great institutions, with a regional, national and global reach, attracting the very best and brightest minds. Our staff and students shape the world around us for the better: we attract and partner with like-minded people.

Whether contributing to the development of new anti-cancer drugs, adding to the understanding of how black holes are formed, revolutionising the study of ancient settlements, convening academic expertise to offer solutions to the climate crisis, or analysing public attitudes towards democracy around the world, the University's research is remarkable in its breadth, quality and impact. The University also sits at the heart of Europe's largest technology cluster and has catalysed more than 1,500 high-tech companies. And yet what inspires our 24,000 students and 13,000 staff is not what has already been achieved, but what is possible in the future.

The education and experience of our students, based on a partnership between the University's academic Departments and Faculties and the 31 Colleges, is second to none. Every student is a member of one of the Colleges, each a community of students, academics and staff drawn from across the University's comprehensive range of subject areas.

The University is a self-governing community, with a system for decision-making that provides a high degree of accountability and transparency to its members. Each Department and Faculty is part of one of six academic Schools, but each of them, and each individual academic, has a great deal of autonomy. The Colleges are independent and self-governing, working in a symbiotic relationship with the University.

The University has a number of Institutions that are independent of any Faculty or Department and are not part of the academic Schools. These include the Institute of Continuing Education (which provides high-quality education to adults throughout their lives), the Fitzwilliam Museum, Kettle's Yard (an historic house and gallery that holds important collections of modern art) and the University Library. In addition to their diverse contributions to University and public life, these non-School Institutions are also important centres of teaching and research.

Cambridge University Press & Assessment provides academic publishing, examinations and learning materials worldwide, supporting the dissemination of research, academic development at school and in higher education, and international student mobility. Legally, the Press & Assessment is a department of the University. It provides very important funds to invest in the academic purposes of the University.

The University has made truly remarkable contributions to the sum of human understanding, with breakthrough ideas and discoveries that have changed the way we understand ourselves, our planet, and the universe around us. Yet the global and national contexts in which it operates are fast-changing and increasingly filled with uncertainty. In a world that is becoming - politically, economically, socially, and technologically – ever more interconnected but even less equal, the University's mission – “to contribute to society through the pursuit of education, learning and research at the highest international levels of excellence” – has never been more relevant.

About Us

The University is one of the world's leading academic centres. It comprises 150 faculties and departments, together with a central administration and other institutions. Our institutions, museums and collections are a world-class resource for researchers, students and members of the public representing one of the country's highest concentrations of internationally important collections.

The University has an annual income of £2 billion. Research income, won competitively from the UK Research Councils, the European Union (EU), major charities and industry, exceeds £500 million per annum and continues to grow.

The Colleges and the University remain committed to admitting the best students regardless of their background and to investing considerable resources both in widening access and financial support. The 31 Colleges are self-governing, separate legal entities which appoint their own staff. Many academic staff are invited to join a College as a Teaching Fellow, which provides a further social and intellectual dimension. The Colleges admit undergraduate students, provide student accommodation and pastoral support and deliver small group teaching for undergraduates.

The University awards degrees and its faculties and departments provide lectures and seminars for students and determine the syllabi for teaching.

Our instinct for seeking out excellence and setting up enduring and mutually beneficial collaborations has led us to establish strategic partnerships across the globe. Whether it is the successful Cambridge-Africa Programme involving universities in Ghana, Uganda and elsewhere on the African continent; or the close association with the government of India to pursue new research in crop science; or the creation, with Germany's Max Planck Institutes, of a Cambridge-based centre for the study of ethics, human economy and social change – international partnerships are now an inextricable part of the University's make-up.

“Through its outstanding education, research and innovation, the University of Cambridge has made – and continues to make – a lasting contribution to human knowledge and is flourishing. By working at the University of Cambridge, you will be joining a vibrant community of students, scholars and professional services staff committed to supporting and enhancing the University's mission to contribute to society.”

*Professor Deborah Prentice,
Vice Chancellor 2023*

Working at the University

Working at Cambridge you will join a diverse, talented and innovative community, with more than 24,000 students and over 13,000 staff from all walks of life and corners of the world.

The University continually explores strategies to attract and retain the best people. It is committed to supporting its staff to achieve their best. We are a fair, diverse and inclusive society and we believe our staff are our greatest asset. There is strong commitment to developing institutional leadership and supporting and encouraging staff development at all levels.

The University offers a variety of roles including academic, research, professional, managerial and support roles. We also offer extensive benefits and excellent learning opportunities within a stimulating working environment.

The University's estate is undergoing the most significant transformation in its history. Cambridge has been able to create a science and technology campus to the west of the city centre, and is expanding further to the north west of Cambridge including investing in affordable homes for University key workers and community facilities. Even with their continued development, the University remains within walking or cycling distance across the campus. The University is a major partner on the Cambridge Biomedical Campus and continues to redevelop its historic city centre sites demonstrating a clear determination to ensure that we can offer the best facilities and opportunities for our staff and students.

Equality, Diversity and Inclusion

The University has built its excellence on the diversity of its staff and student community. We aim to be a leader in fostering equality and inclusion, and in promoting respect and a sense of belonging for all. We encourage applications from all sections of society. All appointments are made on the basis of merit. We have an Equal Opportunities Policy, along with a range of diversity groups, including the Women's Staff Network, Race Equality Network and LGBT+ Staff Network. More details are available here:

<http://www.equality.admin.cam.ac.uk/>

The University has a bronze Race Equality Charter award, with a framework for improving the representation, progression and success of minority ethnic staff and students within higher education. Furthermore, the University's silver Athena swan award recognises and celebrates good practice in recruiting, retaining and promoting gender equality.

Living in Cambridge

Cambridge is rich in cultural diversity. From beautiful University and College buildings, museums and art galleries, quaint gardens and punts on the River Cam, to a vibrant restaurant and café scene, our employees are surrounded by the wonderful features of this unique city.

You can find a wide-range of high street shops and 3 shopping centres, with independent alternatives at the historic market and nestled within the passageways in the city centre. You will find a cinema, bowling alley, a nightclub and various live performances at the Cambridge Leisure Park, with further entertainment options at the Corn Exchange, Arts Theatre and the ADC Theatre. Further information can be found on the Visit Cambridge website.

If you prefer the faster pace of life, London is a 45-minute train journey away. For those travelling from overseas, Stansted Airport is just 45 minutes away and Heathrow Airport under 2 hours away. The University is a short distance from a host of other attractions such as Ely Cathedral, Newmarket Races and various wildlife parks and stately homes. Cambridge is also within easy reach of the beautiful Broads and coastlines of Norfolk and Suffolk.

Relocation Support

The University recognises the importance of helping individuals to move and settle into a new area. We provide support and guidance to those relocating internationally or domestically to take up a post at the University of Cambridge, liaising with other University offices and selected partners to ensure comprehensive relocation support is available. This includes: accommodation, childcare, schools, banking, immigration and transport. If you would like further information, please visit

<https://www.accommodation.cam.ac.uk/RelocationService/>. The Shared Equity Scheme and the Reimbursement of Relocation Expenses Scheme provide financial assistance to qualifying new members of

Accommodation Service

The University Accommodation Service helps staff, students and visiting scholars who are affiliated to the University in their search for suitable accommodation in Cambridge. The dedicated accommodation team can provide access to a wide range of University-owned furnished and unfurnished properties, and has a database of private sector accommodation available for short and long-term lets. For further information and to register with this free service please visit:

<https://www.accommodation.cam.ac.uk/>

What Cambridge can offer

We offer a comprehensive reward package to attract, motivate and retain high performing staff at all levels and in all areas of work.

The University offers a wide range of competitive benefits, from family leave entitlement, to shopping and travel discount schemes. Our generous annual leave package contributes to the positive wellbeing of our University employees. Sabbatical leave enables academics to focus on research and scholarship, whilst still maintaining their full salary. The University also has a [career break scheme](#) for academic and academic-related staff, with additional flexible working policies for all other staff.

Pay and benefits

The University salary structure includes automatic service-related pay progression in many of its grades and an annual cost of living increase. In addition to this, employees are rewarded for outstanding contribution through a number of regular pay progression schemes. The University offers attractive pensions schemes for employees, with an additional benefit of a salary exchange arrangement providing tax and national insurance savings.

CAMbens employee benefits

The University offers employees a wide range of competitive benefits, known as CAMbens. CAMbens offers something for everyone across a range of categories, including:

- Financial Benefits, including shopping discounts (both local and national) and a Payroll Giving scheme;
- Relocation and Accommodation Benefits, including relocation assistance and interest-free Rental Deposit Loans;
- Travel Benefits, including Cycle to Work, discounts on train season tickets and interest-free Travel to Work loans;
- Family Friendly and Lifestyle Benefits, including support with childcare and family friendly policies;
- Health and Wellbeing Benefits, including a University Staff Counselling Service, discounts at the University Sports Centre, and other local gyms, and healthcare schemes.

What Cambridge can offer

Family-friendly policies

The University recognises the importance of supporting its staff. We have a range of family-friendly policies to aid employees' work-life balance including a generous maternity, adoption and shared parental leave entitlement of 26 weeks' full pay, and paid emergency leave for parents and carers.

Other family-friendly support includes:

Our highly regarded workplace nurseries, a childcare salary exchange scheme and a high-quality holiday Playscheme are available to help support University employees with caring responsibilities (subject to demand and qualifying criteria). Further childcare information can be found here:

<https://www.childcare.admin.cam.ac.uk/>

The Newcomers and Visiting Scholars Group (<https://www.nvs.admin.cam.ac.uk/>) is an organisation within the University that welcomes the partners and families of visiting scholars and new members of the University. Run by volunteers, the group offers opportunities to visit interesting Cambridge venues, learn about the community, take part in social events and gain local knowledge while developing a strong support network of both residents and other newcomers.

Your wellbeing

The University's Sport Centre, Counselling Services and Occupational Health are just some of the support services available to University employees to promote their physical and mental wellbeing. The University delivers The Festival of Wellbeing annually, which is a programme of stimulating talks and activities, which aim to promote wellbeing and good mental and physical health. The University also hosts the [Cambridge Festival](#), which is a great opportunity to get your first taste of public engagement, through volunteering, supporting hands-on activities or proposing a talk.

Development opportunities

We support new employees to settle in through various activities as well as supporting their professional and career development on an ongoing basis. Our Personal and Professional Development (PPD) team provide development opportunities for all University employees, including face-to-face sessions, online learning modules and webinars. All employees also have unlimited access to LinkedIn Learning to support their development. Both new and existing employees can undertake funded Apprenticeships, which lead to a range of vocational and professional qualifications. We offer reduced staff fees for University of Cambridge graduate courses and the opportunity to attend lectures and seminars held by University departments and institutions. A range of University training providers also offer specialist learning and development in their own areas e.g. teaching and learning, digital literacy, finance, health and wellbeing, safety.

How to apply

Applications should be submitted online via the University of Cambridge jobs page www.jobs.cam.ac.uk by clicking “Apply online” in the job advert. You will need an email address to register for our online system.

Conversations about flexible working are encouraged at the University of Cambridge. Please feel free to discuss flexibility prior to applying (using the contact information below) or at interview if your application is successful.

Informal enquiries are welcomed and should be directed to: Jean Adams

Email: jma79@medschl.cam.ac.uk

If you have any queries regarding the application process, please the HR team:

Recruitment@mrc-epid.cam.ac.uk

The closing date for applications is: midnight on 4th May 2025

The interview date for the role is: 23rd May 2025
