

Computational Biologist / Data Scientist

Cambridge-GSK Translational Immunology Collaboration (CG-TIC)

Department of Medicine

Closing date: 1st June 2025

Job Reference: RC45882

Computational Biologist / Data Scientist

Cambridge-GSK Translational Immunology Collaboration (CG-TIC)

Salary:

£41,671 - £55,755 per annum

Contract:

Fixed Term – 2 years

Location:

Cambridge

Department:

Medicine

Responsible to:

Senior Computational Biologist

Working Pattern:

Full Time

Purpose of the role

We are recruiting a Computational Biologist / Data Scientist to join the CG-TIC, a new translational immunology initiative between Cambridge and GSK focused on renal and respiratory diseases. CG-TIC will leverage the world-class capabilities of Cambridge and GSK, targeting diseases of high unmet medical need, with the aim of delivering impact to patients while advancing the GSK pipeline, and supporting research in Cambridge. The partnership is built around three key themes, involving the integration of patient phenotyping, understanding mechanisms of disease, and advancing oligonucleotide therapeutics.

The Computational Biologist will be part of a team of academic data scientists working on a wide variety of collaborative projects in medicine across CG-TIC, involving clinical and experimental data. This will include spatial transcriptomics and other genomic datasets, proteomics and other large datasets including electronic health records data. You will utilise cutting-edge tools and platforms for the ingestion, processing and analysis of data and will be comfortable presenting results to others in the collaboration and at conferences. You will be working with a wide range of stakeholders, including clinical and lab-based investigators, as well as partners at GSK to develop project-specific analysis plans and to share approaches to data analysis. You will also interact regularly with the data management team, collaborating on infrastructure and pipelines and ensuring that the needs of all partners in the collaboration are met.

Key Responsibilities

- Study design and analysis planning
- Engage with various stakeholders, including clinical and lab-based investigators, to understand project requirements and develop tailored analysis plans.
- Collaborate on developing computational and analytical plans for studies in a team of bioinformaticians / data scientists.
- Work on project-specific analysis plans tailored to the needs of various stakeholders.
- Undertake single cell data analyses and integrative multi-omics approaches.

Key Responsibilities continued

- Apply appropriate statistical methods and machine learning techniques.
- Extract insights from the data, underpinning interpretations of results.
- Descriptive analysis and data modelling.
- Make use of bioinformatics and statistical techniques and visualisation using R and Python.
- Maintain a knowledge and understanding of cutting-edge tools and packages for genomic and/or healthcare record analyses.
- Select and run appropriate analytical packages (e.g. from GitHub, CRAN, Bioconductor) for use in pipelines.
- Work closely with partners at GSK to share best practices in data analysis and to ensure that the analytical needs of all stakeholders are addressed.

Person Specification

Criteria	Essential	Desirable
Education		
First degree/Masters / level 7 vocational qualifications in a scientific/ mathematics discipline.	✓	
A PhD in an appropriate field (as above), or an equivalent level of demonstrable experience, is highly desirable.		✓
Specialist Knowledge & Skills		
Experience in single cell data analyses and integrative multi-omics approaches		✓
Ability to process and analyse large biological datasets using R and Python	✓	
Experience working with bioinformatics tools and pipelines (e.g., Nextflow)	✓	
Familiarity with developing pipelines on a high-performance computing cluster		✓
A background in immunology and experience working with clinical trial data		✓
Experience working across large collaborations		✓
Excellent organisational and communication skills	✓	
Proven ability to efficiently manage time to handle multiple tasks and meet deadlines.	✓	

Behavioural Attributes

This section summarises the behavioural attributes (or competencies) that we expect the role holder to be able to demonstrate, at what level and whether this is an essential or desirable requirement.

Full definitions are at: <https://www.hr.admin.cam.ac.uk/policies-procedures/behavioural-attributes>

Please review these and provide specific examples in your application of how you have demonstrated these attributes in your work, education or other experience. It will assist your application if you explain the situation, what you did and what the outcomes were.

Attribute	Level
Valuing Diversity	A
Achieving Results	B
Communication	B
Innovation and Change	B
Negotiating and Influencing	C
People Development	B
Relationship Building	B
Strategic Focus	B

Department of Medicine

Vision

The Department of Medicine seeks to produce the highest quality research output while increasing the efficacy of translation, delivering a global impact upon clinical practice and patient wellbeing. We seek to enhance graduate education, and its interface with the NHS both at the research and clinical levels, while focusing on the success, wellbeing and diversity of its key resource, our staff and students.

Research Priorities

Our strategic priorities are focused on four Departmental Sections. Cardiovascular and Respiratory Medicine (**CaRM**), Immunology and Infectious Disease (**ImID**), Perioperative, Acute, Critical Care and Emergency Medicine (**PACE**) and Specialty Medicine, Research and Training (**SMaRT**). Our **CaRM** and **ImID** priorities are delivered through the Victor Phillip Dahdaleh Heart & Lung Research Institute (**VPD-HLRI**) and the Cambridge Institute for Therapeutic Immunology and Infectious Disease (**CITIID**), while **PACE** is housed in Cambridge University Hospital. Our scientists can leverage access to patient samples, technologies and datasets, enabled by our strategic location on the biomedical campus.

The **CaRM** Section works with other academic departments across the Clinical School and NHS to foster collaborative research between academic, clinical and commercial partners. **CaRM** successfully renewed its status as a BHF Centre for Research Excellence in 2024. In collaboration with the Cardiorespiratory BRC theme, **CaRM** supports the **VPD-HLRI**'s mission of improving cardiovascular and lung health across the world by working collaboratively across the university, NHS, commercial and charitable sectors.

ImID provides a critical role supporting **CITIID** in establishing itself as a leading international institute by delivering outstanding science which contributes to our understanding of immune-mediated and infectious diseases. A major focus of **ImID** is fostering global health research

through partnerships with institutions such as National University of Singapore - Cambridge Immune Phenotyping Centre, the Hong Kong Jockey Club Global Health Institute.

PACE makes substantial clinical and research contributions, with our clinical academics holding leading roles in national policy and clinical trials. Notably, **PACE** leads on the Lancet Neurology Commission on Traumatic Brain Injury and coordinating the International Initiative on Traumatic Brain Injury Research.

The primary role of **SMaRT** is to optimise links with the NHS through formal links with NHS Clinical Service Leads in both the Cambridge University & Royal Papworth Hospitals, the department can host promote clinical academic training and hosts many clinical academic trainees.

Structure

With 550 staff and students, and a further 200 visitors, the Department of Medicine is the largest in the School of Clinical Medicine. We house over 80 Principal Investigators, 50% of whom are clinically active; and hold over 250 active grants worth **£150M** with an annual expenditure of **£30M**. The Department sits at the forefront of medical research, delivering scientific success, demonstrable clinical impact, and actively contributing to the development of the BioMedical campus. We ensure interaction with industry is a major focus of our work, building on the longstanding presence of the GSK Cambridge Clinical Unit, the recent arrival of the Global Research and Corporate Headquarters of AstraZeneca and the growing presence of BioNTech.

Cambridge Institute of Therapeutic Immunology & Infectious Disease

The Cambridge Institute of Therapeutic Immunology & Infectious Disease (CITIID) is a new institute, opened in 2019, which unites expert groups in infectious disease and immunity, including autoimmune disease, cellular immunity and inflammatory disease. The Institute houses up to 250 scientists working within 25 research groups conducting both fundamental and translational research on human disease. Work focuses on understanding the pathogenesis and improving the management of immune-related disorders, and transforming our understanding of how infectious agents interact with humans.

Based within the Jeffrey Cheah Biomedical Centre, and located on the Cambridge Biomedical Campus, CITIID provides researchers with advanced facilities that are in close proximity. This includes the largest academic biosecure containment level 3 facility in the UK and access to the Addenbrooke's Centre for Clinical Investigation, which provides world-class facilities for experimental medicine and early- and late-phase clinical studies. CITIID also incorporates the Molecular Immunity Unit, which is embedded within the MRC Laboratory of Molecular Biology, and which provides state-of-the-art facilities for the molecular dissection of immune mechanisms.

Underpinning the work of CITIID scientists is finding solutions to key immunological challenges to human health. These include improving our understanding of i) immune-mediated and infectious disease, the incidence of which is increasing worldwide; ii) pandemics and anti-microbial resistance; and iii) the role that climate change may play in shaping immune responses. To achieve this, CITIID members have established relationships with researchers across the globe, including the

International Vaccine Institute, Seoul, the National University of Singapore, and labs in India and elsewhere. CITIID also has collaborative programmes in more than 20 low- and middle-income countries across Africa and Asia, with a focus on capacity building and microbial surveillance. This is especially important for improving our understanding of the emergence of antimicrobial resistance, and for identification of the next pandemic threats.

CITIID scientists have also been heavily involved in the local University and national response to COVID-19, with the entire Institute rapidly moved over to COVID-19 research at the start of the pandemic, and only months after the Institute opened its doors. This has included providing crucial insights into public health measures, the immunology behind the body's response to SARS-CoV-2 infection, and being central to the UK's widespread sequencing of virus genomes as part of the COG-UK consortium.

www.citiid.cam.ac.uk

School of Clinical Medicine

Doing great work in a great place to work

About the school

The School of Clinical Medicine currently employs nearly 3,000 people, spanning all varieties of staff type from Academic Professors to administrative support.

In 1976 in response to the recommendation of the Royal Commission on Medical Education in the late 1960's, a complete medical course was re-established in Cambridge with the opening of the School of Clinical Medicine at the new Addenbrooke's Hospital site.

On 21st November 1980, HRH The Duke of Edinburgh, the Chancellor of the University of Cambridge, officially opened the Clinical School Building which presently accommodates the medical library, lecture theatres and seminar rooms.

The University of Cambridge School of Clinical Medicine aspires to change the practice of medicine and improve biological understanding in a wide range of clinical specialties and scientific disciplines. Collaborative research, both within biomedicine and crossing the boundaries to the mathematical, physical and social sciences, is key to our approach. The School also supports key enabling technologies and facilities in imaging, bioinformatics and biological systems. The main areas of research interest are:

- Cancer research
- Cardio-Respiratory Medicine
- Cellular mechanisms of disease
- Diabetes, Endocrinology and Metabolism
- Epidemiology, Public Health and Primary Care
- Genetics and Genetic Medicine
- Haematological and Transplantation Medicine
- Infection and Immunity
- Neurosciences and Mental Health
- Stems Cells and Regenerative Medicine.

Professor Patrick Maxwell
Regius Professor of Physics
Head of the School of Clinical Medicine

The School aims to provide leadership in education, discovery and healthcare. It will achieve this through: inspirational teaching and training, outstanding basic and clinical research and integration of these to improve medical practice for both individual patients and the population.

The School will:

Through inspirational teaching and training, educate individuals who:

- will become exceptional doctors or biomedical scientists
- combine a depth of scientific understanding with outstanding clinical and communication skills demonstrate a caring, compassionate and professional approach to patients and the public and
- are equipped to become future international leaders of their profession.

Through its commitment to the pursuit of excellence, support scientists of international standing in basic and clinical research aiming to:

- understand fundamental biology and thereby the mechanisms underlying disease integrate basic and clinical research
- apply a rigorous mechanism-based approach to clinical problems and innovate to solve the health challenges of our society.

The Cambridge Cluster

The Cambridge Phenomenon, Silicon Fen, the Cambridge Cluster – these are all names used to describe the remarkable concentration of high-tech businesses situated around Cambridge, and that focus on software, electronics and biotechnology. Starting in the 1960s with the launch of Cambridge Consultants, formed to *‘put the brains of Cambridge University at the disposal of industry’*, the Cambridge Phenomenon has seen an explosion of globally significant companies and innovations across biosciences, medicine and technology, leading to Cambridge being Europe’s largest technology cluster. Smartphones, CERN, DNA sequencing and home pregnancy testing kits all contain innovations that have arisen via the Cambridge Phenomenon.

In 2019-2020 the Cambridge Cluster included 26,000+ companies with a combined turnover of £48 billion that together employed nearly 239,000 people. The city publishes 341 patents per 100,000 residents – more than the next four cities in the UK combined.

A major part of the success of the Cambridge Phenomenon, the life sciences sector employs around 21,000 staff, and includes more than 600 companies with a combined turnover of £7 billion. 138 new companies were formed in this sector in 2019-2020 alone. The strength of this sector is apparent when considering the effects of the global COVID-19 pandemic and lockdowns; employment growth still rose by 2.3%, despite the unprecedented challenges brought about by COVID-19.

Many of these life sciences companies have links to the Cambridge Biomedical Campus (CBC). As the largest biomedical campus in Europe, the CBC locates world-leading academics on the same site as the teaching hospitals of the University of Cambridge, enabling the rapid and effective translation of research into science. The CBC is the home for more than 20,000 researchers, clinicians and healthcare professionals.

This includes 10,000 staff in the Cambridge University Hospitals Foundation Trust which includes Addenbrooke’s Hospital and The Rosie Maternity Hospital. The recently opened Royal Papworth Hospital is also based on campus.

Other companies are based in the 30+ science and technology parks that are located in and around Cambridge. These include the renowned Babraham Research Campus, the Wellcome Sanger Institute, and the Wellcome Genome Campus. AstraZeneca has its global R&D headquarters in Cambridge and multinational healthcare companies including Amgen, Biogen, Illumina, Gilead Sciences, GSK, Otsuka, and NAPP also have a presence in Cambridge, as do Google, Amazon and Microsoft.

Key research areas for the CBC are in:

- Cellular, molecular and structural biology
- Genomics
- Data Science
- Stem cells and regenerative medicine
- Public health, primary care and applied health research
- Education and training

Recent successes have included the lead role of Cambridge in COG-UK, a consortium of universities, NHS organisations, the UK’s four public health agencies and the Wellcome Sanger Institute. COG-UK is a £20 million endeavour that has pioneered the use of large-scale, rapid whole genome sequencing of SARS-CoV-2, with over 480,000 virus genomes now sequenced. This work has been vital in understanding virus transmission and evolution, and for informing public health responses and vaccine development during the COVID-19 pandemic.

Terms of Appointment

Tenure and probation

Appointments will be made on a fixed-term basis for a period of 2 year in the first instance, as your employment relies on the availability of finite funds for a specific purpose that are not part of the University's general revenues. There may be the possibility of extension.

Appointments will be subject to satisfactory completion of a nine-month probationary period.

Hours of Work and Working Pattern

The position will be full-time, working Monday – Friday. The exact working pattern will be communicated to you by your institution.

The post may require some late-shift work. Any such work will be compensated by time off in lieu.

Pension

You will automatically be enrolled to become a member of USS (Universities Superannuation Scheme) – a defined benefits pension scheme. For further information please visit: www.pensions.admin.cam.ac.uk/.

Annual leave

Full time employees are entitled to annual paid leave of 41 days inclusive of public holidays. For new part-time employees, annual leave will be pro rata'd based on days worked.

General information

Pre-employment checks

Right to work in the UK

We have a legal responsibility to ensure that you have the right to

to work in the UK before you can start working for us. If you do not have the right to work in the UK already, any offer of employment we make to you will be conditional upon you gaining it.

Health declaration

Once an offer of employment has been made the successful candidate will be required to complete a work health declaration form.

Qualifications

The person specification for this position lists qualifications that are essential and/or desirable. Please note that if you are offered the post you will be asked to provide your relevant original certificates of these qualifications.

References

Offers of appointment will be subject to the receipt of satisfactory references.

Screening check

This role requires a Research Passport with the relevant Trust.

Equality and Diversity

We particularly encourage women and /or candidates from a Black, Asian and Minority Ethnic background to apply for this vacancy as they are currently under-represented at this level within our University.

Information if you have a disability

The University welcomes applications from individuals with disabilities. We are

committed to ensuring fair treatment throughout the recruitment process. We will make adjustments to enable applicants to compete to the best of their ability wherever it is reasonable to do so and, if successful, to assist them during their employment.

Information for disabled applicants is available at <http://www.admin.cam.ac.uk/offices/hr/staff/disabled/>

We encourage you to declare any disability that you may have, and any reasonable adjustments that you may require, in the section provided for this purpose in the application form. This will enable us to accommodate your needs throughout the process as required. However, applicants and employees may declare a disability at any time.

If you prefer to discuss any special arrangements connected with a disability, please contact, the Department Administrator, who is responsible for recruitment to this position. Alternatively, you may contact the Clinical School Recruitment Team who are responsible for recruitment to this position via: cshrstaffhub@admin.cam.ac.uk

The University

The University of Cambridge is one of the world's oldest and most successful universities. We are a renowned centre for research, education, and scholarship that makes a significant contribution to society. The University is consistently ranked amongst the top universities in the world. Our affiliates have won more Nobel Prizes than any other University.

Our sustained pursuit of academic excellence is built on a long history of first-class teaching and research within a distinctive collegiate system. For eight centuries our ideas and innovations have shaped the world. Our principal goal is to remain one of the world's leading universities in an increasingly competitive global higher education sector. Today the University of Cambridge is at the centre of a cluster of over 4,300 businesses employing 58,000 people.

Our capital investment projects include the West Cambridge site, the North West Cambridge development and the growth of the Biomedical Campus in the south of the city. The North West Cambridge development includes the opening of a primary school – the first in the UK to be managed by a University. So we are deeply embedded in, and committed to serving, our local community. These are all conspicuous signs of a University that is not only adapting to new needs, but also anticipating the future.

Our mission is to contribute to society through the pursuit of education, learning, and research at the highest international levels of excellence. Our core values are:

- freedom of thought and expression; and
- freedom from discrimination.

About Us

The University is one of the world's leading academic centres. It comprises 150 faculties and departments, together with a central administration and other institutions. Our institutions, museums and collections are a world-class resource for researchers, students and members of the public representing one of the country's highest concentrations of internationally important collections.

The University has an annual income of £2 billion. Research income, won competitively from the UK Research Councils, the European Union (EU), major charities and industry, exceeds £500 million per annum and continues to grow.

The Colleges and the University remain committed to admitting the best students regardless of their background and to investing considerable resources both in widening access and financial support. The 31 Colleges are self-governing, separate legal entities which appoint their own staff. Many academic staff are invited to join a College as a Teaching Fellow, which provides a further social and intellectual dimension. The Colleges admit students, provide student accommodation and deliver small group teaching.

The University awards degrees and its faculties and departments provide lectures and seminars for students and determine the syllabi for teaching and conducting research.

Our instinct for seeking out excellence and setting up enduring and mutually beneficial collaborations has led us to establish strategic partnerships across the globe. Whether it is the successful Cambridge-Africa Programme involving universities in Ghana, Uganda and elsewhere on the African continent; or the close association with the government of India to pursue new research in crop science; or the creation, with Germany's Max Planck Institutes, of a Cambridge-based centre for the study of ethics, human economy and social change – international partnerships are now an inextricable part of the University's make-up.

“Through its outstanding education, research and innovation, the University of Cambridge has made – and continues to make – a lasting contribution to human knowledge and is flourishing. By working at the University of Cambridge, you will be joining a vibrant community of students, scholars and professional services staff committed to supporting and enhancing the University's mission to contribute to society.”

**Prof Deborah Prentice,
Vice Chancellor 2023**

Working at the University

Working at Cambridge you will join a diverse, talented and innovative community, with more than 18,000 students and over 16,000 staff from all walks of life and corners of the world.

The University continually explores strategies to attract and retain the best people. It is committed to supporting its staff to achieve their best. We are a fair, diverse and inclusive society and we believe our staff are our greatest asset. There is strong commitment to developing institutional leadership and supporting and encouraging staff development at all levels.

We offer a variety of roles including academic, research, professional, managerial and support roles. We also offer extensive benefits and excellent learning opportunities within a stimulating working environment.

The University's estate is undergoing the most significant transformation in its history. Cambridge has been able to create a new science and technology campus to the west of the city centre, and is now expanding further to the north west of Cambridge including investing in affordable homes for University key workers and community facilities. Even with our continued development, the University remains within walking or cycling distance across the campus. The University is a major partner on the Cambridge Biomedical Campus and we continue to redevelop our historic city centre sites demonstrating our determination to ensure that we can offer the best facilities and opportunities for our staff and students.

Equality & diversity

The University has built its excellence on the diversity of its staff and student community. We aim to be a leader in fostering equality and inclusion, and in promoting respect and a sense of belonging for all. We encourage applications from all sections of society. All appointments are made on the basis of merit. We have an Equal Opportunities Policy, along with a range of diversity networks for women, black and minority ethnic and lesbian, gay, bisexual and transgender staff. More details are available here: <http://www.equality.admin.cam.ac.uk/>

The University has a bronze Race Equality Charter aware, with framework for improving the representation, progression and success of minority ethnic staff and students within higher education. Furthermore, the University's Athena SWAN award recognises and celebrates good practice in recruiting, retaining and promoting women.

Living in Cambridge

Cambridge is rich in cultural diversity. From beautiful University and College buildings, museums and art galleries, quaint gardens and punts on the River Cam, to a vibrant restaurant and café scene, our employees are surrounded by the wonderful features of this unique city.

You can find a wide-range of high street shops and 3 shopping centres, with independent alternatives at the historic market and nestled within the passageways in the city centre. You will find a cinema, bowling alley, a nightclub and various live performances At the Cambridge Leisure Park, with further entertainment options at the Corn Exchange, Arts Theatre and the ADC Theatre. Further information can be found on the [Visit Cambridge](#) website.

If you prefer the faster pace of life, London is a 45 minute train journey away. For those travelling from overseas, Stansted Airport is just 45 minutes away and Heathrow Airport under 2 hours away. The University is a short distance from a host of other attractions such as Ely Cathedral, Newmarket Races and various wildlife parks and stately homes. Cambridge is also within easy reach of the beautiful Broads and coastlines of Norfolk and Suffolk.

Relocation Support

The University recognises the importance of helping individuals to move and settle into a new area. We provide support and guidance to those relocating internationally or domestically to take up a post at the University of Cambridge, liaising with other University offices and selected partners to ensure comprehensive relocation support is available. This includes: accommodation, childcare, schools, banking, immigration and transport. If you would like further information, please visit <https://www.accommodation.cam.ac.uk/>. The Shared Equity Scheme and the Reimbursement of Relocation Expenses Scheme provide financial assistance to qualifying new members of staff with the costs of relocating to Cambridge.

Accommodation Service

The University Accommodation Service helps staff, students and visiting scholars who are affiliated to the University in their search for suitable accommodation in Cambridge. The dedicated accommodation team can provide access to a wide range of University-owned furnished and unfurnished properties, and has a database of private sector accommodation available for short and long-term lets. For further information and to register with this free service please visit <https://www.accommodation.cam.ac.uk/>

What Cambridge can offer

We offer a comprehensive reward package to attract, motivate and retain high performing staff at all levels and in all areas of work.

The University offers a wide range of competitive benefits, from family leave entitlement, to shopping and travel discount schemes. Our generous annual leave package contributes to the positive wellbeing of our University employees. Sabbatical leave enables academics to focus on research and scholarship, whilst still maintaining their full salary. The University also has a career break scheme for academic and academic-related staff, with additional flexible working policies for all other staff.

Pay and benefits

The University salary structure includes automatic service-related pay progression in many of its grades and an annual cost of living increase. In addition to this, employees are rewarded for outstanding contribution through a number of regular pay progression schemes. The University offers attractive pensions schemes for employees, with an additional benefit of a salary exchange arrangement providing tax and national insurance savings. Payroll giving is also a simple, tax-efficient way for employees to make monthly donations to charity.

CAMbens employee benefits

We offer a CAMbens scheme for University employees, providing access to online and in-store shopping discounts and cashback. With more than 2,000 participating retailers, employees can save money on a wide range of household expenses, from groceries and clothes, to holidays and insurance and much more. A range of local discounts are also available, helping employees to save money whilst also supporting local Cambridge businesses and a CAMbens Cycle to Work salary sacrifice scheme is also available, which enables employees to save money on transport costs. A 10% discount rate on the purchase of train season tickets, bulk buy tickets and an interest free travel to work loan are also available for staff of the University.

What Cambridge can offer

Family-friendly policies

The University recognises the importance of supporting its staff. We have a range of family-friendly policies to aid employees' work-life balance including a generous maternity, adoption and shared parental leave entitlement of 18 weeks full pay and emergency family care support via My Family Care.

Other family-friendly support includes:

Our highly regarded workplace nurseries, a childcare salary exchange scheme and a high quality holiday Playscheme may be available to help support University employees with caring responsibilities (subject to demand and qualifying criteria). Further childcare information can be found here:

<https://www.childcare.admin.cam.ac.uk/>

The Newcomers and Visiting Scholars Group is an organisation within the University run by volunteers whose aim is to help newly arrived wives, husbands, partners and families of Visiting Scholars and members of the University to settle in Cambridge and give them an opportunity to meet local people. The Office of Postdoctoral Affairs supports the postdoctoral community within Cambridge. Further details are available here: <https://www.opda.cam.ac.uk/>

Your wellbeing

The University's Sport Centre, Counselling Services and Occupational Health are just some of the support services available to University employees to promote their physical and mental wellbeing. There are many societies in Cambridge catering for almost every taste and interest. Whether you want to take part in a sport, participate in music or drama, pursue a hobby, or join a political group, you will almost certainly find that a society exists for this purpose. The University also hosts the [Cambridge Science Festival](#) and [Cambridge Festival of Ideas](#), as well as [Open Cambridge](#) weekend, which together attract over 50,000 visitors per year. The festivals are a great opportunity to get your first taste of public engagement, through volunteering, supporting hands-on activities or proposing a talk.

Development opportunities

We support new employees to settle in through various activities. The encouragement of career development for all staff is one of the University's values and we put this into practice through various services and initiatives. Our Personal and Professional Development Department provides development opportunities and courses for all University employees. These include face-to-face sessions, online learning modules and webinars. Employees may also apply for financial support to undertake training that will lead to a qualification. We offer reduced staff fees for University of Cambridge graduate courses and the opportunity to attend lectures and seminars held by University departments and institutions. Apprenticeship programmes are also available to support employees to develop their skills, experience and qualifications.

Clinical School Benefits

Cambridge Biomedical Campus

Being based on Cambridge Biomedical Campus gives the University of Cambridge School of Clinical Medicine employees an unrivalled range of on-site amenities.

These include:

Core amenities

- Marks & Spencer Simply Food
- Clothes & Gift shops
- The Body Shop
- Newsagent
- Barclays Bank
- Hairdressers
- Costa Coffee/Starbucks
- Various food outlets

Sports and Leisure

The Frank Lee Sports and Leisure Centre on the Campus is open to everyone who works on the Campus including employees of companies. The Centre offers a comprehensive range of activities for both adults and children (during the school holidays). Facilities include a 25m heated indoor pool, tennis and squash courts, cardio gym and fitness rooms. There is also a licensed bar, restaurant and function rooms.

Childcare

Bright Horizons Long Road nursery is located on the Campus making it an ideal location for parents who work at the site. The nursery is purpose built and houses five home bases, each designed specifically for babies, toddlers and pre-school children, as well as a spacious and secure external area in which children can play and explore the outdoors.

Apprenticeship opportunities

These are available for new and current members of staff to earn while they learn. The University is committed to nurturing talent and developing expertise through providing relevant vocational and professional apprenticeships across all of its departments and institutions.

Clinical School Wellbeing Programme

Following the launch of the Clinical School Wellbeing Programme in April 2014 it has continued to develop and grow each year. The School holds regular wellbeing talks and events in addition to hosting two dedicated Wellbeing Weeks packed with activities for staff each year. Activities include staff massages, smoothie bikes, step challenges, arts and crafts sessions and many more.

The School also has a team of Mental Health First Aiders recruited and trained from our own pool of staff. The School is always looking for new ways to engage staff and encourage them to look after their physical and mental wellbeing.

Equality, Diversity and Inclusion

The School of Clinical Medicine has a dedicated governance group overseeing equality, diversity and inclusion related activities. Regular talks are held throughout the year and all staff members are expected to undertake Equality and Diversity training.

The School has a number of networks for different staff groups encouraging communication and sharing of practices. There is also a growing network of 100+ Equality Champions who meet termly and help raise awareness of equality, diversity and inclusion within their departments. The School currently holds a silver Athena SWAN award utilising the process to critically analyse all areas of equality and diversity within the school.

How to apply

Applications should be submitted online via the University of Cambridge jobs page www.jobs.cam.ac.uk by clicking “Apply online” in the job advert. You will need an email address to register for our online system.

Conversations about flexible working are encouraged at the University of Cambridge. Please feel free to discuss flexibility prior to applying (using the contact information below) or at interview if your application is successful.

Informal enquiries are welcomed and should be directed to:

Prof. Eoin McKinney, CG-TIC Data lead

efm30@cam.ac.uk

Dr Nicholas Horrocks, CG-TIC Programme Manager

nh415@cam.ac.uk

If you have any queries regarding the application process, please contact csrstaffhub@admin.cam.ac.uk

UNIVERSITY OF
CAMBRIDGE
