

# Research Associate - Bioinformatics

Department of Oncology

Closing Date: 20<sup>th</sup> July 2025

Job Reference: RD46190

# Research Associate - Bioinformatics

**Salary:**

£36,924- £ 45,163 per annum

**Contract:**Fixed Term until 31<sup>st</sup> August 2027**Location:**

Cambridge

**Department:**

Oncology

**Responsible to:**

Senior Bioinformatician

**Working Pattern:**

Full Time

**Purpose of the role**

The [Precision Breast Cancer Institute](#) (PBCI) is a renowned research facility that plays a critical role in advancing breast cancer research and transforming patient care. As an integral part of the Cancer Research UK (CRUK) Cambridge Centre, the PBCI serves as a pivotal link between clinical care and cutting-edge research, driving breakthroughs that have a profound impact on breast cancer treatment worldwide. Led by Professor Jean Abraham, co-lead for the CRUK Cambridge Centre Breast Programme, the PBCI collaborates closely with teams across the University of Cambridge including the Early Cancer Institute, Computer Science, and CRUK Cambridge Institute, as well as hospital departments, and external and industry partners such as Illumina and the Mark Foundation Institute for Integrated Cancer Medicine.

We are currently seeking a highly skilled and driven bioinformatician to join our dynamic team at the PBCI. In this role, you will contribute to computational and statistical analyses of genomic data, clinical data, and other critical trial/study-related information. Your work will have a direct impact on advancing clinical trials and optimising standard of care practices, including the transformative PARTNER early breast cancer trial and the pioneering Personalised Breast Cancer Programme (PBCP). The goal of the PBCP is to leverage whole genome sequencing to provide personalised insights that inform patient care and treatment decisions, revolutionising the way breast cancer is managed within the NHS and further afield.

As a member of our collaborative team, you will have the opportunity to drive ground-breaking research that translates into tangible benefits for patients. Your contributions will be instrumental in developing clinically useful algorithms and methodologies that aim to enhance treatment stratification and improve prognosis in the early breast cancer setting. Furthermore, your work will contribute to high-impact publications that shape the field of breast cancer research and drive advancements in personalised medicine.

Working closely with scientific and clinical professionals, you will be actively involved in evaluating and integrating state-of-the-art bioinformatics techniques, enabling the identification of critical molecular features and abnormalities in tumour DNA and RNA derived from clinical cancer

specimens. Your efforts will also involve developing robust reporting systems that deliver whole genome sequencing results to clinicians, ensuring their seamless integration into an NHS setting.

This is an exceptional opportunity to make a lasting impact on breast cancer research and patient care. As a valued member of our team, you will have the chance to collaborate with external partners, stay abreast of emerging sequencing technologies, and explore novel third-party software tools that hold the potential for implementation. By working closely with colleagues within the PBCI and beyond, you will contribute to the continuous improvement of bioinformatic analysis methodologies, fostering an environment of innovation and excellence.

At the PBCI, we value diversity and inclusivity. We encourage applications from individuals from all backgrounds, and we are committed to providing a supportive and inclusive work environment that nurtures growth and fosters creativity.

Join us in our mission to drive impactful research, revolutionise patient care, and contribute to the global fight against breast cancer.

**Key responsibilities:**

- Process, analyse, and interpret high volumes of data as part of the personalised breast cancer programme and other scientific studies. Develop automated methods and software to support large-scale bioinformatics analysis.
- Develop and implement analytical tools capable of troubleshooting technical steps and filtering poor-quality sequencing information. Monitor performance characteristics of published and emerging analytical pipelines and mutation detection algorithms.
- Maintain reporting systems for the delivery of whole genome sequencing results.
- Research and validate potential biomarkers associated with breast cancer progression, treatment response, or patient outcomes, using bioinformatics tools and statistical approaches.
- Contribute to therapeutic target validation by integrating genetic data and bioinformatics approaches to identify potential treatments for breast cancer.
- Explore methods to harmonise and integrate data from separate cohort studies, enabling comparative analyses and leveraging larger datasets for robust conclusions.
- Visualise complex genomic and clinical data to effectively communicate findings to researchers, clinicians, and stakeholders.
- Collaborate with researchers involved in separate cohort studies, both within the PBCI and external institutions, to facilitate data harmonisation, exchange expertise, and jointly investigate research questions.
- Contribute to the long-term management, curation, and accessibility of research data to ensure valuable resources for future studies.
- Responsibilities may evolve as directed by the line management depending on the post-holders skill development and research requirements.

# Person Specification

Criteria	Essential	Desirable
<b>Education</b>		
Educated to degree level in a scientific discipline (e.g., bioinformatics, computer science or biological science).	✓	
Postgraduate education in bioinformatics or a quantitative subject (e.g. PhD or MPhil in Computational Biology, Health Data Science, Epidemiology).	✓	
Experience in cancer research, including a working understanding of computational approaches for cancer genome analysis.		✓
<b>Specialist knowledge &amp; skills</b>		
Working knowledge of Bash, Python, R and other scripting languages. Ability to understand and modify existing code, as well as develop new scripts.	✓	
Experience of working with GATK, MuTECT or other mutation-calling software.		✓
System design, testing, implementation and documentation (including use of Git version control or similar)		✓
Routine data analysis and manipulation	✓	
Preparing tables and figures for research meetings and publications	✓	
Experience collating and analysing data from separate studies (e.g. data harmonisation, meta-analysis)		✓
Experience analysing longitudinal datasets		✓
Experience using genomic data in epidemiological studies (e.g. Mendelian randomisation, polygenic risk scores)		✓
<b>Interpersonal &amp; communication skills</b>		
Excellent teamwork and interpersonal skills	✓	
Excellent verbal and written communication skills, enabling communication with all levels of staff	✓	

Criteria	Essential	Desirable
Ability to prioritise and plan work efficiently, and work unsupervised	✓	
<b>Relevant experience</b>		
Management of data storage infrastructure and implementation of efficient processing solutions in a high-performance computing cluster environment		✓
Managing the security requirements of sensitive data		✓
Familiarity with an academic medical research environment		✓
<b>Additional requirements</b>		
Motivated to further training and development of technical skills	✓	
Ability to devise and implement technical solutions to operational requirements	✓	
Ability to manage multiple simultaneous projects, and react with agility to changing requirements	✓	
Strong organisational, problem-solving and decision-making skills	✓	

# Behavioural Attributes

This section summarises the behavioural attributes (or competencies) that we expect the role holder to be able to demonstrate, at what level and whether this is an essential or desirable requirement.

Full definitions are at: <https://www.hr.admin.cam.ac.uk/policies-procedures/behavioural-attributes>

Please review these and provide specific examples in your application of how you have demonstrated these attributes in your work, education or other experience. It will assist your application if you explain the situation, what you did and what the outcomes were.

Attribute	Level
Valuing Diversity	A
Achieving Results	B
Communication	C
Innovation and Change	C
Negotiating and Influencing	C
People Development	C
Relationship Building	B
Strategic Focus	C

# Department of Oncology

The Department of Oncology is an academic department within the School of Clinical Medicine at the University of Cambridge.

In August 2015 Professor Richard Gilbertson, a world leading expert on childhood brain tumours, was appointed Head of Department and Director of the Cancer Research UK Cambridge Centre.

*The mission of the Department of Oncology is to reduce the morbidity and mortality of patients with cancer through research, treatment and education.*

We are based within 11 geographical locations:

- Cambridge Breast Cancer Research Unit
- Cambridge Cancer Trials Centre (S4 Block, Coton House & Norman Bleeahan Offices)
- Cancer Research UK Cambridge Institute
- Clifford Allbutt Building, Cancer Molecular Diagnostics Laboratory
- Clinical Oncology - R4 Block
- Early Cancer Institute
- Strangeways Research Laboratory
- Wellcome Trust-MRC Stem Cell Institute
- Wellcome Trust Sanger Institute

Our location on the Biomedical Research Campus provides access to state-of-the-art clinical and research facilities and enables close collaboration with world class laboratory scientists and doctors

We have 200 staff and students, including 18 Research Group Leaders, many of whom are also medical doctors, which ensures strong

links between our laboratory science and its clinical application for the benefit of patients.

## Our research

The Department of Oncology is at the forefront of an ever-expanding field of cancer research.

Our main focus is on translating basic scientific findings into clinical applications for treatment, diagnosis and prevention of cancer.

The research interests of the Department are funded mainly by Cancer Research UK, the Medical Research Council and the National Institute of Health Research (NIHR) Cambridge Biomedical Research Centre and can be divided into 3 broad disciplines:

- Basic Laboratory Research
- Translational Research
- Clinical Research

Our Research Group Leaders (many of whom are also practising clinicians), direct multi-disciplinary teams, which ensures strong links between our laboratory science and its clinical application for the benefit of patients.

Professor Richard Gilbertson, Head of Department.

# School of Clinical Medicine

Doing great work in a great place to work

## About the School

The School of Clinical Medicine currently employs nearly 3,000 people, spanning all varieties of staff type from Academic Professors to administrative support.

In 1976 in response to the recommendation of the Royal Commission on Medical Education in the late 1960's, a complete medical course was re-established in Cambridge with the opening of the School of Clinical Medicine at the new Addenbrooke's Hospital site.

On 21st November 1980, HRH The Duke of Edinburgh, the Chancellor of the University of Cambridge, officially opened the Clinical School Building which presently accommodates the medical library, lecture theatres and seminar rooms.

The University of Cambridge School of Clinical Medicine aspires to change the practice of medicine and improve biological understanding in a wide range of clinical specialties and scientific disciplines. Collaborative research, both within biomedicine and crossing the boundaries to the mathematical, physical and social sciences, is key to our approach. The School also supports key enabling technologies and facilities in imaging, bioinformatics and biological systems. The main areas of research interest are:

- Cancer research
- Cardio-Respiratory Medicine
- Cellular mechanisms of disease
- Diabetes, Endocrinology and Metabolism
- Epidemiology, Public Health and Primary Care
- Genetics and Genetic Medicine
- Haematological and Transplantation Medicine
- Infection and Immunity
- Neurosciences and Mental Health
- Stems Cells and Regenerative Medicine.

**Professor Patrick Maxwell, Regius Professor of Physic and Head of the School of Clinical Medicine**

The School aims to provide leadership in education, discovery and healthcare. It will achieve this through; inspirational teaching and training, outstanding basic and clinical research and integration of these to improve medical practice for both individual patients and the population.

## The School will:

Through inspirational teaching and training, educate individuals who:

- will become exceptional doctors or biomedical scientists
- combine a depth of scientific understanding with outstanding clinical and communication skills demonstrate a caring, compassionate and professional approach to patients and the public and
- are equipped to become future international leaders of their profession.

Through its commitment to the pursuit of excellence, support scientists of international standing in basic and clinical research aiming to:

- understand fundamental biology and thereby the mechanisms underlying disease integrate basic and clinical research
- apply a rigorous mechanism-based approach to clinical problems and
- innovate to solve the health challenges of our society.

# Terms of Appointment

## Tenure and probation

Appointments will be made on a fixed -term basis until 31<sup>st</sup> August 2027 due to limited funding for a specific purpose. Appointments will be subject to satisfactory completion of a six-month probationary period.

## Hours of Work and Working Pattern

The hours of work for the position are full-time, working Monday – Friday.

## Pension

You will automatically be enrolled to become a member of USS (Universities Superannuation Scheme) – a defined benefits pension scheme. For further information please visit:

[www.pensions.admin.cam.ac.uk](http://www.pensions.admin.cam.ac.uk) .

## Annual leave

Full time employees are entitled to annual paid leave of 41 days inclusive of public holidays. For new part-time employees, annual leave will be pro rata'd based on days worked.

## General information

### Pre-employment checks

#### Right to work in the UK

We have a legal responsibility to ensure that you have the right to work in the UK before you can start working for us.

If you do not have the right to work in the UK already, any offer of employment we make to you will be conditional upon you gaining it.

**Health declaration** Once an offer of employment has been made the successful candidate will be required to complete a work health declaration form.

**Qualifications** The person specification for this position lists qualifications that are essential

and/or desirable. Please note that if you are offered the post you will be asked to provide your relevant original certificates of these qualifications.

**References:** Offers of appointment will be subject to the receipt of satisfactory references.

## Screening Checks

This role requires a basic disclosure. Any offer of employment we make to you will be conditional upon the satisfactory completion of this check; whether an outcome is satisfactory will be determined by the University. This role requires a research passport with the relevant Trust.

## Equality and Diversity

We particularly encourage women and /or candidates from a Black, Asian and Minority Ethnic background to apply for this vacancy as they are currently under-represented at this level within our University.

## Information if you have a disability

The University welcomes applications from individuals with disabilities. We are committed to ensuring fair treatment throughout the recruitment process. We will make adjustments to enable applicants to compete to the best of their ability wherever it is reasonable to do so and, if successful, to assist them during their employment.

Information for disabled applicants is available at <http://www.admin.cam.ac.uk/offices/hr/staff/disabled/>

We encourage you to declare any disability that you may have, and any reasonable adjustments that you may require, in the section provided for this purpose in the application form. This will enable us to accommodate your needs throughout the process as required. However, applicants and employees may declare a disability at any time.

If you prefer to discuss any special arrangements connected with a disability, please contact, the Department Administrator who is responsible for recruitment to this position. Alternatively, you may contact the Clinical School Recruitment Team who are responsible for recruitment to this position via:

[oncologyhr@admin.cam.ac.uk](mailto:oncologyhr@admin.cam.ac.uk)

# The University

**The University of Cambridge is one of the world's oldest and most successful universities. We are a renowned centre for research, education, and scholarship that makes a significant contribution to society. The University is consistently ranked amongst the top universities in the world. Our affiliates have won more Nobel Prizes than any other University.**

Our sustained pursuit of academic excellence is built on a long history of first-class teaching and research within a distinctive collegiate system. For eight centuries our ideas and innovations have shaped the world. Our principal goal is to remain one of the world's leading universities in an increasingly competitive global higher education sector. Today the University of Cambridge is at the centre of a cluster of over 4,300 businesses employing 58,000 people.

Our capital investment projects include the West Cambridge site, the North West Cambridge development and the growth of the Biomedical Campus in the south of the city. The North West Cambridge development includes the opening of a primary school – the first in the UK to be managed by a University. So we are deeply embedded in, and committed to serving, our local community. These are all conspicuous signs of a University that is not only adapting to new needs, but also anticipating the future.

Our mission is to contribute to society through the pursuit of education, learning, and research at the highest international levels of excellence. Our core values are:

- freedom of thought and expression; and
- freedom from discrimination.

# About Us

**The University is one of the world's leading academic centres. It comprises 150 faculties and departments, together with a central administration and other institutions. Our institutions, museums and collections are a world-class resource for researchers, students and members of the public representing one of the country's highest concentrations of internationally important collections.**

The University has an annual income of £2 billion. Research income, won competitively from the UK Research Councils, the European Union (EU), major charities and industry, exceeds £500 million per annum and continues to grow.

The Colleges and the University remain committed to admitting the best students regardless of their background and to investing considerable resources both in widening access and financial support. The 31 Colleges are self-governing, separate legal entities which appoint their own staff. Many academic staff are invited to join a College as a Teaching Fellow, which provides a further social and intellectual dimension. The Colleges admit students, provide student accommodation and deliver small group teaching.

The University awards degrees and its faculties and departments provide lectures and seminars for students and determine the syllabi for teaching and conducting research.

Our instinct for seeking out excellence and setting up enduring and mutually beneficial collaborations has led us to establish strategic partnerships across the globe. Whether it is the successful Cambridge-Africa Programme involving universities in Ghana, Uganda and elsewhere on the African continent; or the close association with the government of India to pursue new research in crop science; or the creation, with Germany's Max Planck Institutes, of a Cambridge-based centre for the study of ethics, human economy and social change – international partnerships are now an inextricable part of the University's make-up.

“Through its outstanding education, research and innovation, the University of Cambridge has made – and continues to make – a lasting contribution to human knowledge and is flourishing. By working at the University of Cambridge, you will be joining a vibrant community of students, scholars and professional services staff committed to supporting and enhancing the University's mission to contribute to society.”

Prof Deborah Prentice, Vice Chancellor 2023

# Working at the University

**Working at Cambridge you will join a diverse, talented and innovative community, with more than 18,000 students and over 16,000 staff from all walks of life and corners of the world.**

The University continually explores strategies to attract and retain the best people. It is committed to supporting its staff to achieve their best. We are a fair, diverse and inclusive society and we believe our staff are our greatest asset. There is strong commitment to developing institutional leadership and supporting and encouraging staff development at all levels.

We offer a variety of roles including academic, research, professional, managerial and support roles. We also offer extensive benefits and excellent learning opportunities within a stimulating working environment.

The University's estate is undergoing the most significant transformation in its history. Cambridge has been able to create a new science and technology campus to the west of the city centre, and is now expanding further to the north west of Cambridge including investing in affordable homes for University key workers and community facilities. Even with our continued development, the University remains within walking or cycling distance across the campus. The University is a major partner on the Cambridge Biomedical Campus and we continue to redevelop our historic city centre sites demonstrating our determination to ensure that we can offer the best facilities and opportunities for our staff and students.

## Equality & diversity

The University has built its excellence on the diversity of its staff and student community. We aim to be a leader in fostering equality and inclusion, and in promoting respect and a sense of belonging for all. We encourage applications from all sections of society. All appointments are made on the basis of merit. We have an Equal Opportunities Policy, along with a range of diversity networks for women, black and minority ethnic and lesbian, gay, bisexual and transgender staff. More details are available here: <http://www.equality.admin.cam.ac.uk/>

The University has a bronze Race Equality Charter aware, with framework for improving the representation, progression and success of minority ethnic staff and students within higher education. Furthermore, the University's Athena SWAN award recognises and celebrates good practice in recruiting, retaining and promoting women.

# Living in Cambridge

**Cambridge is rich in cultural diversity. From beautiful University and College buildings, museums and art galleries, quaint gardens and punts on the River Cam, to a vibrant restaurant and café scene, our employees are surrounded by the wonderful features of this unique city.**

You can find a wide-range of high street shops and 3 shopping centres, with independent alternatives at the historic market and nestled within the passageways in the city centre. You will find a cinema, bowling alley, a nightclub and various live performances At the Cambridge Leisure Park, with further entertainment options at the Corn Exchange, Arts Theatre and the ADC Theatre. Further information can be found on the [Visit Cambridge](#) website.

If you prefer the faster pace of life, London is a 45 minute train journey away. For those travelling from overseas, Stansted Airport is just 45 minutes away and Heathrow Airport under 2 hours away. The University is a short distance from a host of other attractions such as Ely Cathedral, Newmarket Races and various wildlife parks and stately homes. Cambridge is also within easy reach of the beautiful Broads and coastlines of Norfolk and Suffolk.

## Relocation Support

The University recognises the importance of helping individuals to move and settle into a new area. We provide support and guidance to those relocating internationally or domestically to take up a post at the University of Cambridge, liaising with other University offices and selected partners to ensure comprehensive relocation support is available. This includes: accommodation, childcare, schools, banking, immigration and transport. If you would like further information, please visit <https://www.accommodation.cam.ac.uk/>. The Shared Equity Scheme and the Reimbursement of Relocation Expenses Scheme provide financial assistance to qualifying new members of staff with the costs of relocating to Cambridge.

## Accommodation Service

The University Accommodation Service helps staff, students and visiting scholars who are affiliated to the University in their search for suitable accommodation in Cambridge. The dedicated accommodation team can provide access to a wide range of University-owned furnished and unfurnished properties, and has a database of private sector accommodation available for short and long-term lets. For further information and to register with this free service please visit <https://www.accommodation.cam.ac.uk/>

# What Cambridge can offer

**We offer a comprehensive reward package to attract, motivate and retain high performing staff at all levels and in all areas of work.**

The University offers a wide range of competitive benefits, from family leave entitlement, to shopping and travel discount schemes. Our generous annual leave package contributes to the positive wellbeing of our University employees. Sabbatical leave enables academics to focus on research and scholarship, whilst still maintaining their full salary. The University also has a career break scheme for academic and academic-related staff, with additional flexible working policies for all other staff.

## Pay and benefits

The University salary structure includes automatic service-related pay progression in many of its grades and an annual cost of living increase. In addition to this, employees are rewarded for outstanding contribution through a number of regular pay progression schemes. The University offers attractive pensions schemes for employees, with an additional benefit of a salary exchange arrangement providing tax and national insurance savings. Payroll giving is also a simple, tax-efficient way for employees to make monthly donations to charity.

## CAMbens employee benefits

We offer a CAMbens scheme for University employees, providing access to online and in-store shopping discounts and cashback. With more than 2,000 participating retailers, employees can save money on a wide range of household expenses, from groceries and clothes, to holidays and insurance and much more. A range of local discounts are also available, helping employees to save money whilst also supporting local Cambridge businesses and a CAMbens Cycle to Work salary sacrifice scheme is also available, which enables employees to save money on transport costs. A 10% discount rate on the purchase of train season tickets, bulk buy tickets and an interest free travel to work loan are also available for staff of the University.

# What Cambridge can offer

## Family-friendly policies

The University recognises the importance of supporting its staff. We have a range of family-friendly policies to aid employees' work-life balance including a generous maternity, adoption and shared parental leave entitlement of 18 weeks full pay and emergency family care support via My Family Care.

Other family-friendly support includes:

Our highly regarded workplace nurseries, a childcare salary exchange scheme and a high quality holiday Playscheme may be available to help support University employees with caring responsibilities (subject to demand and qualifying criteria). Further childcare information can be found here:

<https://www.childcare.admin.cam.ac.uk/>

The Newcomers and Visiting Scholars Group is an organisation within the University run by volunteers whose aim is to help newly arrived wives, husbands, partners and families of Visiting Scholars and members of the University to settle in Cambridge and give them an opportunity to meet local people. The Office of Postdoctoral Affairs supports the postdoctoral community within Cambridge. Further details are available here: <https://www.opda.cam.ac.uk/>

## Your wellbeing

The University's Sport Centre, Counselling Services and Occupational Health are just some of the support services available to University employees to promote their physical and mental wellbeing. There are many societies in Cambridge catering for almost every taste and interest. Whether you want to take part in a sport, participate in music or drama, pursue a hobby, or join a political group, you will almost certainly find that a society exists for this purpose. The University also hosts the [Cambridge Science Festival](#) and [Cambridge Festival of Ideas](#), as well as [Open Cambridge](#) weekend, which together attract over 50,000 visitors per year. The festivals are a great opportunity to get your first taste of public engagement, through volunteering, supporting hands-on activities or proposing a talk.

## Development opportunities

We support new employees to settle in through various activities. The encouragement of career development for all staff is one of the University's values and we put this into practice through various services and initiatives. Our Personal and Professional Development Department provides development opportunities and courses for all University employees. These include face-to-face sessions, online learning modules and webinars. Employees may also apply for financial support to undertake training that will lead to a qualification. We offer reduced staff fees for University of Cambridge graduate courses and the opportunity to attend lectures and seminars held by University departments and institutions. Apprenticeship programmes are also available to support employees to develop their skills, experience and qualifications.

# Clinical School Benefits

## Cambridge Biomedical Campus

Being based on Cambridge Biomedical Campus gives the University of Cambridge School of Clinical Medicine employees an unrivalled range of on-site amenities.

### These include:

#### Core amenities

- Marks & Spencer Simply Food
- Clothes & Gift shops
- The Body Shop
- Newsagent
- Barclays Bank
- Hairdressers
- Costa Coffee/Starbucks
- Various food outlets

## Sports and Leisure

The Frank Lee Sports and Leisure Centre on the Campus is open to everyone who works on the Campus including employees of companies. The Centre offers a comprehensive range of activities for both adults and children (during the school holidays). Facilities include a 25m heated indoor pool, tennis and squash courts, cardio gym and fitness rooms. There is also a licensed bar, restaurant and function rooms.

## Childcare

Bright Horizons Long Road nursery is located on the Campus making it an ideal location for parents who work at the site. The nursery is purpose built and houses five home bases, each designed specifically for babies, toddlers and pre-school children, as well as a spacious and secure external area in which children can play and explore the outdoors.

## Apprenticeship opportunities

These are available for new and current members of staff to earn while they learn. The University is committed to nurturing talent and developing expertise through providing relevant vocational and professional apprenticeships across all of its departments and institutions.

## Clinical School Wellbeing Programme

Following the launch of the Clinical School Wellbeing Programme in April 2014 it has continued to develop and grow each year. The School holds regular wellbeing talks and events in addition to hosting two dedicated Wellbeing Weeks packed with activities for staff each year. Activities include staff massages, smoothie bikes, step challenges, arts and crafts sessions and many more.

The School also has a team of Mental Health First Aiders recruited and trained from our own pool of staff. The School is always looking for new ways to engage staff and encourage them to look after their physical and mental wellbeing.

## Equality, Diversity and Inclusion

The School of Clinical Medicine has a dedicated governance group overseeing equality, diversity and inclusion related activities. Regular talks are held throughout the year and all staff members are expected to undertake Equality and Diversity training.

The School has a number of networks for different staff groups encouraging communication and sharing of practices. There is also a growing network of 100+ Equality Champions who meet termly and help raise awareness of equality, diversity and inclusion within their departments. The School currently holds a silver Athena SWAN award utilising the process to critically analyse all areas of equality and diversity within the school.

# How to apply

Applications should be submitted online via the University of Cambridge jobs page [www.jobs.cam.ac.uk](http://www.jobs.cam.ac.uk) by clicking “Apply online” in the job advert. You will need an email address to register for our online system.

Conversations about flexible working are encouraged at the University of Cambridge. Please feel free to discuss flexibility prior to applying (using the contact information below) or at interview if your application is successful.

Informal enquiries are welcomed and should be directed to:  
Professor Jean Abraham

**Email:** [ja344@medschl.cam.ac.uk](mailto:ja344@medschl.cam.ac.uk)

If you have any queries regarding the application process please contact [oncologyhr@admin.cam.ac.uk](mailto:oncologyhr@admin.cam.ac.uk).

The closing date for applications is: 20<sup>th</sup> July 2025

The interview date for the role is: week of the 4<sup>th</sup> August 2025
