The vacancy has arisen as a result of an academic in the Faculty being appointed to the Headship of a College for a fixed period.

The appointee will teach literature, culture and history to undergraduates at introductory, intermediate and advanced levels, in lectures, seminars and small-group supervisions. They will also contribute to examining undergraduates and postgraduates in the German Section and the Faculty, and will help meet the very significant demand for supervising and examining of Year Abroad Projects and Part II Optional dissertations. They also will be expected to support the crucial outreach and engagement efforts of the Section.

The role includes an active contribution to the School of Arts and Humanities Global Humanities strategic research Strand.

The successful candidate will hold a PhD in the field of the post (or will do so by the start of the contract). They will be expected to:

# The Faculty of Modern and Medieval Languages and Linguistics

The Faculty of Modern and Medieval Languages and Linguistics, founded in 1879, is a world-leading centre for teaching and research in language, culture and linguistics at the University of Cambridge and is part of the School of Arts and Humanities. The Faculty comprises eight subject areas: French, German, Italian, Modern Greek, Slavonic Studies, Spanish & Portuguese, Theoretical & Applied Linguistics, and Film. With nearly 1,000 students (over 770 undergraduates, 65 MPhil students and 140 PhD students) we are one of the largest humanities Faculties in the University and one of the largest languages Faculties nationally.

The Faculty combines excellence in teaching, academic rigour and research with a strong tradition of pastoral support for its students. It is a vibrant place to study and work, and since 2016 these factors have regularly helped it top University league tables. In terms of research excellence, the Faculty has consistently been ranked among the very best in the world in national and international assessments. For example, in the 2021 Research Excellence Framework (REF) it was in clear first position for 'research power' among Faculties of its type in the UK.

## **The German Section**

The German Section within MMLL is one of a small number of research-intensive units at world-class universities to offer German Studies from the beginnings of the German language to the present day. Since 2015 it has consistently been the top-ranked outfit in the annual Good University Guide (the only national guide to measure German as a distinct area of study). The current membership of the Section consists of 10 full-time University Teaching Officers, 2 College Teaching Officers and several part-time teachers and postdocs. Courses are offered both at undergraduate and MPhil levels, and the breadth of the Section is also reflected in the PhD research it supports. The Section prides itself on a vibrant, supportive and progressive research and teaching culture, with a particular focus on diversity and inclusion.

All undergraduates in the Faculty initially study two languages. The standard first-year undergraduate intake for German is between 50 and 65 students, who start either with an advanced-level qualification or at ab initio level. Subsequently students may choose from a wide range of options in German, in comparative studies or linguistics. Undergraduate degree courses in the Faculty normally last four years (including the year abroad). The Section also participates in three MPhil courses (European, Latin American and Comparative Literatures and Cultures, Film and Screen Studies, and Linguistics). Colleagues in the Section supervise PhD students across a full range of German Studies, including the literature and culture of all periods, history and thought, film, and linguistics.

Further information is available on the Faculty's website, <https://www.mml.cam.ac.uk> and in the University's Guide to Courses. More detailed information on courses in German is available at <https://www.mml.cam.ac.uk/german/>.

The website includes a list of members of the Section, showing their teaching and research interests.

# The University

**The University of Cambridge is consistently ranked one of the best universities in the world, achieving academic excellence through its Faculties, Departments and other Institutions, together with the 31 Colleges.**

The University is renowned for its record of discovery and innovation. It is one of the great institutions, with a regional, national and global reach, attracting the very best and brightest minds. Our staff and students shape the world around us for the better: we attract and partner with like-minded people.

Whether contributing to the development of new anti-cancer drugs, adding to the understanding of how black holes are formed, revolutionising the study of ancient settlements, convening academic expertise to offer solutions to the climate crisis, or analysing public attitudes towards democracy around the world, the University's research is remarkable in its breadth, quality and impact. The University also sits at the heart of Europe's largest technology cluster and has catalysed more than 1,500 high-tech companies. And yet what inspires our 24,000 students and 13,000 staff is not what has already been achieved, but what is possible in the future.

The education and experience of our students, based on a partnership between the University's academic Departments and Faculties and the 31 Colleges, is second to none. Every student is a member of one of the Colleges, each a community of students, academics and staff drawn from across the University's comprehensive range of subject areas.

The University is a self-governing community, with a system for decision-making that provides a high degree of accountability and transparency to its members. Each Department and Faculty is part of one of six academic Schools, but each of them, and each individual academic, has a great deal of autonomy. The Colleges are independent and self-governing, working in a symbiotic relationship with the University.

The University has a number of Institutions that are independent of any Faculty or Department and are not part of the academic Schools. These include the Institute of Continuing Education (which provides high-quality education to adults throughout their lives), the Fitzwilliam Museum, Kettle's Yard (an historic house and gallery that holds important collections of modern art) and the University Library. In addition to their diverse contributions to University and public life, these non-School Institutions are also important centres of teaching and research.

Cambridge University Press & Assessment provides academic publishing, examinations and learning materials worldwide, supporting the dissemination of research, academic development at school and in higher education, and international student mobility. Legally, the Press & Assessment is a department of the University. It provides very important funds to invest in the academic purposes of the University.

The University has made truly remarkable contributions to the sum of human understanding, with breakthrough ideas and discoveries that have changed the way we understand ourselves, our planet, and the universe around us. Yet the global and national contexts in which it operates are fast-changing and increasingly filled with uncertainty. In a world that is becoming - politically, economically, socially, and technologically – ever more interconnected but even less equal, the University's mission – “to contribute to society through the pursuit of education, learning and

# About Us

**The University is one of the world's leading academic centres. It comprises 150 faculties and departments, together with a central administration and other institutions. Our institutions, museums and collections are a world-class resource for researchers, students and members of the public representing one of the country's highest concentrations of internationally important collections.**

The University has an annual income of £2 billion. Research income, won competitively from the UK Research Councils, the European Union (EU), major charities and industry, exceeds £500 million per annum and continues to grow.

The Colleges and the University remain committed to admitting the best students regardless of their background and to investing considerable resources both in widening access and financial support. The 31 Colleges are self-governing, separate legal entities which appoint their own staff. Many academic staff are invited to join a College as a Teaching Fellow, which provides a further social and intellectual dimension. The Colleges admit undergraduate students, provide student accommodation and pastoral support and deliver small group teaching for undergraduates.

The University awards degrees and its faculties and departments provide lectures and seminars for students and determine the syllabi for teaching.

Our instinct for seeking out excellence and setting up enduring and mutually beneficial collaborations has led us to establish strategic partnerships across the globe. Whether it is the successful Cambridge-Africa Programme involving universities in Ghana, Uganda and elsewhere on the African continent; or the close association with the government of India to pursue new research in crop science; or the creation, with Germany's Max Planck Institutes, of a Cambridge-based centre for the study of ethics, human economy and social change – international partnerships are now an inextricable part of the University's make-up.

"Through its outstanding education, research and innovation, the University of Cambridge has made - and continues to make - a lasting contribution to human knowledge and is flourishing. By working at the University of Cambridge, you will be joining a vibrant community of students, scholars and professional services staff, committed to supporting and enhancing the University's mission to contribute to society."

Professor Deborah Prentice,  
Vice Chancellor, 2023
